ATIF RAZA

Shopify & Full-Stack Web Developer | Shopify Plus · WordPress · React/Next.js · Node.js/PHP

Lahore, Pakistan (Remote) · +92 307 5579632 · ratif9739@gmail.com · linkedin.com/in/atif-raza-97952a197 · github.com/Atif0987

PROFESSIONAL SUMMARY

Shopify and full-stack web developer with 3+ years of experience delivering e-commerce and CMS solutions for international clients. Specialized in Shopify Plus, from Liquid theme development to custom apps, Checkout UI Extensions, Shopify Functions, and headless storefronts, with strong WordPress/WooCommerce, React/Next.js, and Node.js/PHP experience. Comfortable working remotely across US, UK, European, Gulf, and Australian time zones.

CAREER HIGHLIGHTS

- **50+ Shopify stores** delivered for international clients, including 30+ Shopify Plus stores.
- **Public Shopify App Store app** (Session Flow) co-developed and maintained.
- **4+ custom Shopify apps** and 2+ custom WordPress plugins built from scratch.
- **Checkout UI Extensions, Shopify Functions,** subscription integrations, and WooCommerce-to-Shopify migrations shipped to production.

Backend & Data: Node.js, PHP, Laravel, GraphQL, REST APIs, OAuth, Webhooks, MySQL, PostgreSQL, Prisma ORM

APIs & Tools: Shopify Admin GraphQL API, Storefront API, Loop Subscriptions API, Payment Gateways, OpenAI API, Git, GitHub, GitLab, Postman, Figma, Vercel

PROFESSIONAL EXPERIENCE

Shopify Developer
Sep 2026 – Present

My Digital People

- Develop Shopify themes in Liquid using Online Store 2.0 sections, blocks, and theme settings so merchants can manage content without code changes.
- Built location-aware content pages using Shopify Metaobjects, a single reusable template, and browser geolocation, letting the client manage per-city content from the admin.
- Build custom storefront features and Shopify app functionality to client requirements across multiple concurrent projects.

Shopify Developer
Mar 2026 – Sep 2026

Skylinx Technologies

- Built Checkout UI Extensions for Shopify Plus, including a checkout product carousel that surfaces additional products to customers before purchase.
- Implemented Shopify Functions to customize checkout and commerce logic.
- Integrated Loop Subscriptions APIs for Maeva's recurring billing and subscription bundles, creating subscription transactions before cart creation so recurring payments process correctly.
- Built a headless Shopify storefront for Guts App using React.js and the Storefront API.
- Co-developed and maintained Session Flow, a paid public app on the Shopify App Store (see Featured Projects).

Senior Shopify Developer
Jan 2026 – Mar 2026

Bufferstack

- Worked on Shopify and Shopify Plus client stores in a senior developer capacity.

Software Engineer (Shopify & WordPress) May 2023 – Dec 2025
Techleadz

- Delivered Shopify and Shopify Plus stores for international clients on Online Store 2.0, building reusable sections, theme components, and merchant-specific features.
- Built 4+ custom Shopify apps using the Shopify Admin GraphQL API, REST API, OAuth, and webhooks.
- Migrated WooCommerce stores to Shopify while preserving required e-commerce functionality and customer experience.
- Implemented subscription workflows, payment integrations, metafield-driven features, and third-party API integrations, and optimized theme code to improve storefront performance.
- Built 2+ custom WordPress plugins from scratch, including a listing and filter plugin with Custom Post Types, taxonomies, and auto-generated Gutenberg pages for non-technical editors.
- Developed custom WordPress themes and WooCommerce customizations across product, cart, checkout, pricing, and payments using hooks and filters.
- Collaborated remotely with international clients, designers, and project managers in Agile teams.

FEATURED PROJECTS

Session Flow: Persistent Login – Public Shopify App apps.shopify.com/session-flow
React.js, Shopify Admin GraphQL API, OAuth, Theme App Extension

- Paid Shopify App Store app that keeps customers logged in across visits, so stores retain carts, preferences, and account context for returning shoppers.
- Co-developed merchant authentication, Admin API integration, and the App Embed that installs on draft or live themes without editing theme code.

Dynamic Business Directory – Custom WordPress Application
WordPress, PHP, React.js, Node.js, PostgreSQL, Prisma, OpenAI API

- Built a WordPress application that imports business data from the Google Business Profile API into PostgreSQL and publishes it as directory pages.
- Developed an admin dashboard and automated page creation through the WordPress REST API and reusable templates.
- Integrated the OpenAI API to generate SEO-focused content and images, reducing manual content work.

Shopify & Shopify Plus Client Work
Shopify Plus, Liquid, Metafields, Payment Integrations

- BitsyBug Boutique: checkout optimization and metafields architecture. Vitality CBD: payment gateway and compliance integrations.
- Jewelry Lab: custom Shopify theme and app integrations. Residence Supply and Retrofam: Shopify Plus store development.

EDUCATION

Bachelor of Science in Software Engineering 2018 – 2022
University of Sargodha
